

...to help little ones
in Africa receive
proper care, so that
they too can start
their lives with a
promising future...
full of health,
happiness,
learning
and love.

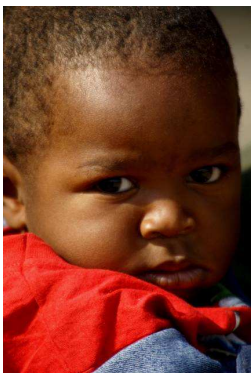

*A Gift of Care
has been given in your honor...*

Every mother cherishes tucking her baby in at night knowing that he or she is safe and healthy.

Many mothers around the world raise their little ones in communities where access to medical care is days away and further out of reach financially.

In Africa, two thirds of newborn fatalities could be avoided if only knowledge and accessible care could reach these communities.

With early detection and cost-effective care for breathing, feeding and fighting infection, these infants would have a significantly better chance to live healthy lives... and become the creative solutions to their community's challenges.

*This gift gives these
moms and babies the hope
they deserve.*

Infancy International advances sustainable, family-centered solutions for infant health and development in under-resourced communities in Africa.

We create partnerships with infant health specialists to respond to some of the greatest challenges facing infants and those who parent them.

Your Gift of Care

The Gift of Nursery Necessities

In order to provide optimal care for infants in each partnering hospital nursery, the staff must have access to many basic supplies.

This gift helps stock a nursery with essentials such as thermometers, bandages, sterilizing kits and cloth diapers.

Thank you for the hope you provide to special infants and parents in Africa to live their lives in health, happiness and love.
