

...to help little ones  
in Africa receive  
proper care, so that  
they too can start  
their lives with a  
promising future...  
full of health,  
happiness,  
learning  
and love.

*A Gift of Care  
has been given in your honor...*

Every mother cherishes tucking her baby in at night knowing that he or she is safe and healthy.

Many mothers around the world raise their little ones in communities where access to medical care is days away and further out of reach financially.

In Africa, two thirds of newborn fatalities could be avoided if only knowledge and accessible care could reach these communities.

With early detection and cost-effective care for breathing, feeding and fighting infection, these infants would have a significantly better chance to live healthy lives... and become the creative solutions to their community's challenges.

*This gift gives these  
moms and babies the hope  
they deserve.*

Infancy International advances sustainable, family-centered solutions for infant health and development in under-resourced communities in Africa.

We create partnerships with infant health specialists to respond to some of the greatest challenges facing infants and those who parent them.

*Your Gift of Care*

**The Gift of Parenting**

Some infants require specialized care and attention for developmental and health risks.

This gift allows the parents of one hospitalized baby to receive 5 hours of education individualized to the child, practical instruction and a home treatment plan.

This gift will also help optimize the baby's recovery and provide hope for a more enriched life.

Thank you for the hope you provide to special infants and parents in Africa to live their lives in health, happiness and love.
